

Claims

- [c1] 1) An air filter holding tray for use in the air conduit systems, comprising:
a frame
at least one sealing element; and
holding system for holding said sealing element to the frame.
- [c2] 2) An air filter holding tray according to claim 1 wherein said holding system for holding said sealing element are tray tracks.
- [c3] 3) An air filter holding tray according to claim 1, wherein the sealing element is further connected to fibers or bristles.
- [c4] 4) An air filter holding tray according to claim 1, wherein the sealing element includes fibers or bristles.
- [c5] 5) An air filter holding tray according to claim 1, wherein the fibers or bristles are made from organic or inorganic fibers.
- [c6] 6) An air filter holding tray according to claim 5, wherein the fibers or bristles are made from polymers.

- [c7] 7) An air filter holding tray according to claim 6, wherein the polymer is polypropylene.
- [c8] 8) An air filter holding tray according to claim 1, wherein said the sealing element has at least two sides, first side that is substantially connected to the tray tracks of the frame and a second side that connected to the fibers or bristles.
